Contract Task Order 038

Subject: Final Work Plan for Remedial Action at Sites 3 and 7 (Groundwater)
Naval Submarine Base-New London (NSB-NLON), Groton, Connecticut

Dear Ms. Keckler / Mr. Lewis:

On behalf of the United States Navy, Tetra Tech NUS, Inc. is pleased to submit to the United States Environmental Protection Agency, Region 1 (USEPA) three copies and the Connecticut Department of Environmental Protection (CTDEP) one copy of the subject document for your files. An electronic copy of the document is included with each hard copy of the document.

This Work Plan documents the field work that is required to initiate the groundwater monitoring programs and land use controls for Sites 3 and 7. Groundwater monitoring and land use controls were selected as the remedy for these sites in the Interim Record of Decision for Sites 3, 7, 14, 15, 18, and 20 Groundwater (December 2004) and the Remedial Design for Land Use Controls at Sites 3 and 7 (June 2005). TiNUS and the Navy anticipate that field work associated with the Work Plan will begin the last week of March 2006. If you have any questions regarding the enclosed document or the upcoming field work, please contact Mr. Mark Evans of Engineering Field Activity Northeast at (610) 595-0567 (ext. 162) or me at (412) 921-8984.

Sincerely,

Corey A. Rich, P.E.
Project Manager/Base Coordinator
