M. H. Johansson
Captain, United States Navy
Commanding Officer
Naval Support Activity Norfolk

RE: Third Five-Year Review Report
Naval Station Norfolk (NSN)
Portsmouth, Virginia 23511

Dear Captains Culler and Johansson:

Thank you for submitting the report, entitled *Five-Year Review Report*, dated December 2013, to the United States Environmental Protection Agency (EPA) for review and concurrence. The report was prepared to address the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Section 121 (c), five-year review requirements for the Naval Station Norfolk National Priorities List site. EPA has reviewed this five-year review report and found it consistent with EPA's June 2001 guidance document, *Comprehensive Five Year Review Guidance* (OSWER No. 9355.7-03B-P, EPA 540-R-01-007).

EPA concurs with the U.S. Navy's determination that the remedies for the sites are protective of human health and the environment:

- Site 1—Camp Allen Landfill (CALF)
- Site 2—Naval Magazine (NM) Slag Pile
- Site 3—Q-Area Drum Storage Yard (QADSY)
- Site 6—CD Landfill
- Site 18 – Former NM Disposal Area
- Site 20—Building LP-20
- Site 22—Camp Allen Salvage Yard (CASY)
- Site 23—Building LP-20 Plating Shop
- Solid Waste Management Unit (SWMU) 14
- Site 2—Naval Magazine (NM) Slag Pile

- Site 3—Q-Area Drum Storage Yard (QADSY)
- Site 6—CD Landfill
- Site 18 – Former NM Disposal Area
- Site 20—Building LP-20
- Site 22—Camp Allen Salvage Yard (CASY)
- Site 23—Building LP-20 Plating Shop
- Solid Waste Management Unit (SWMU) 14

Furthermore, as part of this five-year review, EPA has evaluated the Government Performance and Results Act (GPRA) measures for this site and has determined the status is as follows:

Environmental Indicators:

1. Human Health: Current Exposure Controlled and protective remedies in place
2. Groundwater Migration: Groundwater Migration is Under Control.

The Site is currently Site-Wide Ready for Anticipated Use.

The requirement for this five-year review at NSN was triggered by the Remedial Action start date of August 1995 at OU-1, Site 1, Camp Allen Landfill. A previous five-year review report was completed on July 29, 2009 and the next five-year review will be due July 29, 2019.

If you have any questions, please contact Steven Hirsh, EPA's Remedial Project Manager for the NSN site at 215-814-3352 or hirsh.steven@epa.gov.

Sincerely,

Cecil Rodrigues, Director
Hazardous Site Cleanup Division
