Thank you for the update on your findings regarding the Camp Allen landfill. I appreciate the time and resources you and your command has dedicated to informing the Glenwood Park Civic League of the Navy Installation Restoration Program.

The time and effort dedicated to testing well water in the Glenwood Park neighborhood, and working with each resident whose well water was tested is appreciated and an important part of communicating with those in the City that may be impacted by past Navy work activities. Your command's efforts to inform both the residents, as well as City staff, of tests results from area samples will provide the Glenwood Park residents positive communication on the environment in their neighborhood, and reduce the possibility of a misunderstanding or misinterpretation of testing results.

Again, thank you for the update on your test results. I look forward to receiving your updates on the additional survey work.

Sincerely,

Handwritten signature of Joseph A. Leafe
