**Subject:** Draft CCR for Upper Reaches of Bousch Creek - Site 1 CAL

Winoma,

Subsequent to our review, VDEQ concurs with the removal activities conducted as part of the NTCRA (to mitigate potential eco-risk) for the sediments in the upper reaches of Bousch Creek. In addition, VDEQ recognized that the five RAOs provided in Section 1.3 were completed satisfactorily. Therefore, our office has no further comments on the referenced draft Bousch Creek CCR. Please contact me if you have any questions.

Thank you,

Eric J. Salopek
