Dear Jim,

The work plan for the investigation at Building 301 is enclosed. I have included a draft health and safety plan that applies to this investigation and to the other RFI Phase II/CMS field investigations that will occur later. We can discuss whether you want to submit this new health and safety plan to the EPA for review with the next draft.

Please call me at (703) 471-6405 extension 4322 if you have any questions.

Sincerely,
 CH2M HILL, Inc.
