Subject: RE: Oceana/Fentress MGBR Additional Delineation Work Plan Tech Memo - FOR REVIEW

I have completed my review and have one comment. The drums must be removed from the site within 90 days of being labeled as hazardous waste. You are good to proceed.

Subject: Oceana/Fentress MGBR Additional Delineation Work Plan Tech Memo - FOR REVIEW

Steve,
Attached for DEQ review is the draft Work Plan for Additional Delineation Sampling at the NAS Oceana and NALF Fentress Machine Gun Boresight Ranges. This plan serves as a guideline for the field activities, data quality assessment, and as a supplement to the UFP-SAP prepared for the December 2013 sampling event. We would appreciate it if you could provide review comments by August 6, 2014. Please also send to Kyle for his review as you see fit.

Please call or email me if you have any questions or need additional information.
