Subject: MCRD PI 45 RI Addendum - RTC for EPA and SCDHEC comments
Attachments: GroundwaterTagMap.pdf; RI Addendum RTC SCDHEC Comments.doc; RI Addendum RTC EPA Comments.doc

Please see attached RTC for the EPA and SCDHEC review comments to the October 2005 RI/RFI Addendum. The attached PDF figure is referenced in the SCDHEC RTC. I'm assuming that we all still want to review and discuss draft RTC before making them formal submittals. This is consistent with the document review process we agreed at the November 2005 meeting:

- **Draft document**
 Should be formal document, with a cover letter
 The State (SC DHEC) would like it in hard copy format
 The EPA would like it in an electronic format
- **Written review of comments**
 A general summary statement, then specific by page and paragraph identifying the specific issue, and preferably with the suggested change language
- **Draft RTC with the specific proposed revisions**
 Provided by email. This is often discussed at a team meeting, by phone or through e-mail. This is usually an informal process to ask questions and/or get clarification
 It can also be done by mail (hard copy) as a more formal process
 These are not entered into the final record
 All comments, even by e-mail, are available under the FOI (Freedom of Information). This includes in and out going e-mails
 There are some issues that are priority issues
- **Review of RTC**
 Approval of RTC / Identification of any remaining outstanding issues
- **Formal RTC and change pages to document**
- **Formal regulatory concurrence**
 This goes in the record
- **"Green cover"**

Lila had previously suggested a conference call to discuss the comments. I believe we're better prepared now that potential solutions have been proposed. If the Team still wants a conference call, please let us know and I can set something up. In addition, we can discuss at our next meeting. Thanks.
