PUBLIC NOTICE
The Department of the Navy announces the availability for public comment of the draft final No Further Action Decision Document for Site 30 at Portsmouth Naval Shipyard (PNS) and the dates for a 30-day public comment period on this Decision Document.
Site 30, Former Galvanizing Plant, Building 184, was originally investigated based on observation of a crystalline material along the base of the eastern wall adjacent to an underground tank vault that held tanks used as part of the former galvanizing and metal cleaning facility in Building 184. The tank vault was used from 1943 to 1946 and then from the mid-1950s to early 1960s. The tanks were removed, the tank vault was abandoned in place, and Building 184 was converted into a welding school. After the welding school was moved to a new location, a removal action was conducted to remove the fill material from within the tank vault. Subsequently the Shipyard renovated the building for use to support Shipyard operations. The removal action was conducted to remove metals contamination in the tank vault that was a potential risk for human health. The contamination associated with Site 30 was removed and evaluation of site data showed that the site does not pose a threat to human health or the environment. Therefore, no further action is warranted for Site 30, as documented in the draft final No Further Action Decision Document.
The Navy will hold a public comment period on the draft final No Further Action Decision Document for Site 30 from Tuesday, January 7, 2014 through Wednesday, February 5, 2014.
The public is encouraged to review the draft final No Further Action Decision Document for PNS or at the Information Repositories at Rice and Portsmouth Public Libraries during normal hours of operation:
