Steve,

Here are the Navy legal departments comments on the ABL 5 yr review.

Title page - The NCP citation is wrong. It should be section 300.430(f)(4)(ii) of title 40 of the CFR.

There are several places that refer to "land use controls . . . and institutional controls," as though the latter were not part of the former. They seem to be using "land use controls" to refer to the type of land use controls known as engineered controls, e.g., "(e.g., site security, fencing and signage)." I realize that the term "engineering controls" is more commonly use than "engineered controls," but "engineering controls" is grammatically incorrect. Institutional controls are the second type of land use controls. On page 6, for example, it might be useful to revise "a combination of land use controls (e.g., site security, fencing and signage) and institutional controls" to read "a combination of engineered land use controls, e.g., site security, fencing, and signage, and institutional controls."

Page 19 - NFECML is referred to as the "Mid-Atlantic Division." Delete "Division."

I have not gone through this document with a fine-tooth comb, but I gathered the impression up front that this would not be necessary, and after spending a couple of hours spot-reading throughout the document, I'm reasonably sanguine that the document is generally fine.

If any issues are raised, I'll be happy to consider them.

R/Rymn

Good Morning Rymm,

Below is the electronic address for the ABL five year ROD review. If you have any problems opening / accessing it let me know. I'm not sure if you prefer to review documents in electronic or paper form. If you prefer paper and have trouble printing the document let me know and I will have the contractor generate a copy for you.
