Re: Revised Proposed Language For ABL FFA

Dear Mr. Monroe:

As we discussed two weeks ago, I have taken the original ABL draft, which comports with the Yorktown agreement, and have modified it to reflect the Navy policy revisions. The modifications are in the form of fine tuning rather than a full-scale redraft, and are once again limited to sections two, eleven, twelve, and twenty seven. We can include conforming amendments to the remainder of the agreement after the major changes are settled.

Also as discussed, I provide two "conceptual" paragraphs for use as a starting point in our discussions concerning participation in the site prioritization process and the budget development process. The intent is to memorialize within the agreement a mechanism for all parties to actively participate both in ranking the various sites and in developing LANTNAVFACENGCOM's budget submissions. The first two enclosures refer.

Additional enclosures provide the information requested by West Virginia concerning how ABL compares to other LANTNAVFACENGCOM IR work in Region III. The third and fourth enclosures are LANTNAVFACENGCOM wide for installations located in Region III. Note that these include work under the supervision of three branch heads, one of whom is Ms. Linda Saksvig. The final enclosure lists all sites for IR work under Ms. Saksvig's supervision, which as you will note, includes the ABL as well as other installations in Regions II, III, and IV.

Re: Revised Proposed Language For ABL FFA

If you have any questions, please do not hesitate to get in touch with me. My phone number is (757) 322-4771 and the Fax number is (757) 322-4805, and my internet address is: shepheds@efdlant.navfac.navy.mil. I look forward to working with you.

Sincerely,

D. S. SHEPHERD
Assistant Counsel
Environmental Engineering Branch
Environmental Quality Division
By direction of the Commander
