Re: Draft Final Site 1 Focused Feasibility Study for Groundwater and Draft Focused Feasibility Study for Site 5 Landfill Contents and Surface Soil, Allegany Ballistics Laboratory

Dear Dr. Kagey,

Enclosed are single copies of the subject documents for your review as a technical advisor to the Restoration Advisory Board (RAB) for Allegany Ballistics Laboratory (ABL). As both documents are of significant size, I recommend you forward one to either Mr. Mark Castro or Mr. Darrell Spence to expedite your review.

The Navy will present a brief overview of the Draft Focused Feasibility Study for Site 5 Landfill Contents and Surface Soil at the next RAB meeting on May 15, 1996. A cursory review of that document prior to the meeting would be beneficial to both the Navy and the RAB members.

Please be aware the Draft Final Site 1 Focused Feasibility Study for Groundwater is a revised version of the previously released document but addresses the groundwater only at Site 1. Changes were made in response to comments received from the regulatory community. Please contact me prior to the RAB meeting to request a copy of both the comments and responses should you feel they would be helpful.

I look forward to working with you and the rest of the RAB on this and all other future work at the ABL. Please feel free to contact me at (804) 322-4795 at your earliest convenience.

Sincerely,

J. J. KIDWELL
Remedial Project Manager
Installation Restoration Program (South)
Environmental Programs Branch
Environmental Quality Division
By direction of the Commander
