Commander  
LANTNAVFACENGCOM  
Attention: Code 18221 Mr. Christopher Penny  
1510 Gilbert Street  
Norfolk, VA 23511-2699

Dear Mr. Penny:

Subject: Contract No. N62470-95-D-6007  
Navy CLEAN II Program - Contract Task Order 0019  
Comments on Contractor's Closeout Report for Landfill Cap Construction  
Site 5 - Inert Landfill, Allegany Ballistics Laboratory

CH2M HILL has reviewed the above referenced document received from OHM Remediation Services, Inc. In general, the report is well organized and comprehensive. However, a few minor items should be addressed before final approval of the closeout report is given:

- Section 01115, Paragraph 1.3.1.9 of the project specifications requires OHM to provide documentation of offsite transportation and treatment or disposal of the drill cuttings and purge water generated during installation of the monitoring wells and final cost data for the remediation.
- WV 47 CSR 38 § 6.1.7 requires the closure to be certified by a registered engineer. The final closeout report should contain this certification.
- On page 2-11, correct area of cap is 107,200 square feet.
- In Section 5, Operations and Maintenance, OHM should state that O&M and monitoring activities will be done in accordance with the *latest* version of the O&M Plan. A final O&M plan is will be distributed in early January. The inspection form (Table 1) should be updated appropriately.
- Appendix B, the Non-Woven Geotextile Manufacturing Certification indicates that the certification is for the Tinker AFB Landfill #4 project. Please provide the correct certification for this project.
