Dear Ms. Hayes:

**Draft Work Plan - Groundwater Remediation at Site 10**

I have reviewed the Draft Work Plan Groundwater Remediation - Site 10 dated August 7, 1998. My comments are minor. The plan document looks pretty good. The following is offered for your consideration:

1. Page 1-2, Sect. 1.3, Para 2, Line 1; - I'm not sure what the first sentence means. I have a copy of a final FFS for Site 10 Groundwater dated March 13, 1998. One of us is confused. Is it me?
2. Page 1-3, Para 4, Line 2; - Change "that" to "than".
3. Page 1-4, Para after the bullets, Line 2; - I could not find any reference to the LTMP in Section 1.2.
4. Page 3-2, Sect. 3.1.1.5, Para 3, Line 1; - I request the first sentence be modified to read, "Utility cutovers and interruptions will be coordinated with the Facilities Construction Management Group, and will be conducted outside regular working hours, if required."
5. Page 3-4, Sect. 3.2.2.1; - The last sentence of this section does not appear to be applicable. I suggest it be deleted.
6. Page 3-4, Sect. 3.2.2.2, Line 2; - Change "repairs" to "damage".
7. Page 3-8, Last Sentence; - Please change the last sentence to read, "ABL will adjust explosive quantities in the adjacent buildings to assure compliance with DOD Explosive Safety Board quantity distance requirements.
8. Page 4-2, Sect. 4.2, First Sentence; - Well drilling is identified. To my knowledge, no well drilling will be done as part of this work. Suggest the section be revised to reflect the project scope.

D. B. Hayes  
Groundwater Remediation at Site 10

-2-

9. Figure 1-1; - This figure needs to be reworked to show additional detail of Plant 1. The detail will need to show a different contractor access route to Site 10.

If you have any questions, please give me a call.

Sincerely,

David A. McBride  
Environmental Engineer
