Re: Draft Final Master Project Plan
St. Juliens Creek Annex Site

Dear Mr. Richardson:

This Office of the Department of Environmental Quality (DEQ) has reviewed the Draft Final Master Project Plan for the St. Juliens Creek Annex Site. We wish to make the following comments.

1. Figure 2-2, Locations of Sites at St. Juliens Creek Annex shows the location of 21 sites at the base. It does not, however, show the location of additional Areas of Concern, as identified in the EPIC study. A second map should be inserted to show the location of these additional areas.
2. There is a typographical error on page 2-6. The final paragraph changes font size for the last sentence.
3. Section 3.3 Geology and Hydrogeology mentions that there is an aquifer underlying the site, but contains no mention of groundwater usage in the surrounding area. Groundwater usage should be investigated in the surrounding area and the document should state either that there is no groundwater usage or that usage is being investigated.

We appreciate the opportunity to review and comment upon this and other documents.
We look forward to working with you in the future.

Sincerely,

Paul W. Kohler
Environmental Engineer Consultant
