**Subject:** Draft Background Investigation Report Addendum for Groundwater

Hi, Bob.

The WEQ has completed its review of the subject document. Based on the information provided, no comments regarding this report were noted. It is recommended that prior to finalization the information requested from EPA on the use of UTL or UCL for background be considered [I believe that was Todd's action item from the last meeting?]. If there are any questions, please let me know.

Thanks!
