Team -
I concur with the changes and starting the field work next week.
Karen

Subject: SJCA Site 2 Waste Delineation WP

Hi Team,

We are expecting to receive NAVFAC comments on the revised HASP for the waste delineation activities at Site 2 this week. The field work is currently scheduled to begin this coming Monday in order to complete the fieldwork before the holidays and include the results in the Remedial Design. Based on this schedule, we will not be able to submit hard copies of the final work plan prior to mobilization. Therefore, in order to gain concurrence on the waste delineation activities and keep the schedule as-is, we redlined the draft version of the work plan to show the changes that will be made to the final version. The redlined draft is attached. All comments received on the draft version of the document have been resolved.

Please let us know if you are okay with these changes and if you concur with conducting the waste delineation activities next week. We will submit the final work plan as soon as the HASP has been finalized.

Thanks!

Adrienne Jones
