Subject: RE: SJCA Site 5 Stabilization Tech Memo Response to Comments

Team -

The VDEQ RTCs are acceptable. Please ensure information from all RTCs is included in the text of the document (specifically VDEQ comment #4 and EPA comment #1 & #2).

Thanks,
Karen

Subject: SJCA Site 5 Stabilization Tech Memo Response to Comments

Hi Team,

AGVIQ-CH2M HILL JV II prepared the attached response to comments to the comments you provided on the stabilization tech memo. The response to comments incorporates the revised stabilization approach that Tim Reisch discussed with you. Please let JV II (Taylor Sword or Tim Wenk) know if you are OK with the responses. If so, they will send out a revised tech memo to show you the changes, then incorporate it into the final work plan as an appendix.

Thanks~
Janna
