Bill,

USEPA has reviewed the RTCs and found it acceptable. Once the final version of the document is submitted, a concurrence letter will be issued. Thank you. \

Subject: Site 31 UFP-SAP RTC

Moshood,

Attached are the RTCs to the EPAs November 5th comment regarding the use of the soil to groundwater SSLs (not to be confused with the Eco-SSLs). The Navy agrees with the EPAs recommendation regarding comparison to these values and will evaluate whether there is a need to generate site-specific SSLs and in general how we will use the SSLs along with soil exceedences and groundwater concentrations to come to a comprehensive list of compounds in soil that need to be addressed in the FS.

Please let us know if you have any questions. If you approve of this last comment, we can move toward finalizing the SAP. Wade's comments were responded to by e-mail today and his comments will incorporated into the SAP.

Thanks,
Bill
