RE: Site Assessment Report Addendum for Day Tank 1, Naval Air Station Cecil Field, Jacksonville, Florida

Dear Mr. Magwood:

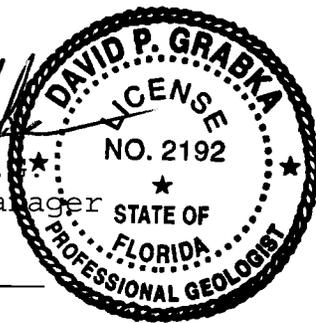

I have completed the review of the Site Assessment Report Addendum (SARA) for Day Tank 1, Naval Air Station Cecil Field, dated November 2003 (received November 12, 2003), prepared and submitted by Tetra Tech NUS, Inc. The report adequately describes the efforts by Tetra Tech to define the extent of free product and soil contamination at this site to the extent practicable. I also concur with the proposed remedial alternative of excavation with off-site disposal as the preferred method of remediation.

If I can be of any further assistance with this matter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka
