RECEIVED
APR 12 1982
GENERAL & MILITARY DIV.

Subj: Pollution Abatement Project for the Hazardous Waste Disposal Site
at Naval Air Station, Jacksonville, FL

Dear Mr. Birnie:

In regards to the subject project and in reference to your correspondence of 6 January 1982, Geraghty & Miller, Inc., the firm which accomplished the initial site study, has addressed the comments provided on the project design. A copy of their reply is attached addressing comments 2 through 6. In regards to comment 1, provisions are made in the project specifications which allow for excavation of the solvent disposal pond to a depth exceeding 8 feet if warranted. Additionally, a NPDES permit is being filed with EPA Region IV for the outfall associated with the surface water from the project site. The permit application identifies monitoring requirements for all organics and metals listed in your comment number 4. Also, a ground water monitoring program is being initiated on a quantity basis for wells S-3 and S-14 covering the same parameters.

I trust that the above satisfies your comments. Your concern with the successful completion of this project is appreciated. Future developments regarding this effort will be coordinated with your office. Should any additional clarification be required on the above or the attached, please contact Mr. J. L. McCauley of this Command's Environmental Branch at the above telephone number.

Very truly yours,

D. R. SPELD, P.E.
Head, Environmental Branch
