RE: Comments on Proposed Plan for Interim Remedial Action

Dear Mr. Gaskins:

Last week I received a letter of transmittal from Mr. Peter Redfern, Senior Project Manager, ABB Environmental Services. This letter requested comments on the proposed final draft plan for Operable Unit two, PSC 42, Naval Air Station Jacksonville.

The City of Jacksonville has reviewed the proposed Interim Remedial Action Plan for Potential Source of Contamination (PSC) 42. The Alternatives presented do offer a choice of actions. The Water Quality Division supports Alternative number 2. This Division rejects Alternative 3. Alternative number 1 leaves some guess work in interpretation of the "Description of Key Components". The question I have concerns the meaning of the statement on page 6 which says, "Onsite redeposition of treated sludge without containment". What does without containment mean?

Thank you for the opportunity to comment on this document. If you have any questions, please contact me at 904/630-3404.

Sincerely,

Gerald A. Young
Associate Pollution Control Engineer
