RE: Draft Sampling Work Plan, Additional Groundwater Assessment for Operable Unit 3,
Area G, Naval Air Station Jacksonville; Jacksonville, Florida

Dear Mr. McGinnis:

I have reviewed the above document dated June 2004 (received August 13, 2004). I have also discussed this effort with Mark Peterson of the Jacksonville TTNUS office. The document describes the effort at delineating groundwater contamination associated with the above facility and the investigation of a possible additional source of contamination. I concur with that proposal.

Thank you for the opportunity to review this document.

Sincerely,

James H. Cason, P.G.
Remedial Project Manager
