Jacksonville, FL 32232-0019

RE: Environmental Resource Permit for Potential Source of  
Contamination (PSC) 18

Dear Mr. Evans:

Enclosed is an Environmental Resource Permit for work in the waters of the United States (wetlands) for cleanup of contaminated site PSC #18 at Mulberry Cove, Naval Air Station, Jacksonville, Florida. PSC #18 had been used for disposal for grit-blasting sand, which exceeds background concentrations for gamma radiation. The material is to be excavated for disposal and backfilled with clean soil to current elevations.

Please verify that this project meets Nationwide Permit (NWP) #38 requirements.

This permit application has been submitted concurrently to the Florida Department of Environmental Protection-Jacksonville District for review.

If you have any questions, please contact either Ms. Diane Lancaster or Ms. Sandra Maynard, Facilities and Environmental Department, at (904) 772-2717. Correspondence should be sent to Commanding Officer, P.O. Box 5, Code 184SM, Naval Air Station, Jacksonville, Florida 32212-5000.

Sincerely,

KEVIN H. GARTLAND  
GM-13  
Environmental Division Director  
By direction of the Commanding Officer

Naval Air Station, Jacksonville  
ATTN: Mr. Kevin Gartland  
P.O. Box 5  
Code 184DL  
Jacksonville, Florida 32212-5000

Dear Mr. Gartland:

Reference is made to your letter dated January 5, 1995, requesting authorization to dredge and fill approximately 2.7 acres of a pond for the purpose of cleaning up toxic waters. The proposed project is located in Section 44, Township 3 South, Range 26 East, Jacksonville, Duval County, Florida.

This verifies that your proposal is authorized by Nationwide Permit number 38 in accordance with the enclosed copy of our regulations as stated in 33 CFR Part 330, Appendix A. This verification is valid until the nationwide permits are scheduled to be modified, reissued, or revoked prior to January 22, 1997. It is incumbent on you to remain informed of changes in these nationwide permits. We will issue a public notice announcing the changes when they occur. Activities which have commenced (i.e., are under construction) or are under contract to commence in reliance on the nationwide permit will remain authorized provided the activity is completed within twelve months of the date the nationwide permit expires, is modified, or is revoked.

A separate Department of the Army permit is not required providing the work is done in accordance with the enclosed drawings/information submitted, the conditions listed in 33 CFR Part 330, Appendix A, Subparagraph C, and any appropriate regional conditions (copy enclosed).

This letter does not give absolute authority to perform the work as specified on your application. The proposed work may be subject to local building restrictions mandated by the National Flood Insurance Program. You should contact your local office that issues building permits to determine if your site is located in a flood-prone or floodway area, and if you must comply with the local building requirements mandated by the National Flood Insurance Program. If the local office cannot provide you the

necessary information, you may provide this office a letter with a small scale map showing the location of the site, requesting a flood-hazard evaluation of the site. The request should be addressed to the Chief, Flood Control and Floodplain Management Branch, Jacksonville District, U.S. Army Corps of Engineers, P.O. Box 4970, Jacksonville, Florida 32232-0019.

This letter does not obviate the requirement to obtain any State or local permits which may be necessary for your proposed work. You should check State permitting requirements with the Florida Department of Environmental Protection. A list of addresses of the appropriate State offices are enclosed for your information and use.

Thank you for your cooperation with our regulatory program.

Sincerely,

  
for  
Marie G. Burns
