RE: Flying Club First Quarter Monitoring Report. Naval Air
Station Key West, Florida

Dear Mr. Glover:

I have reviewed the above referenced report dated December 1999 (received December 20, 1999) and concur with the recommendations stated on page 3. In addition to the parameters to be sampled and analyzed for, I'd recommend that common natural attenuation parameters be also sampled and analyzed for at least during two consecutive quarters.

If I can be of any assistance in this matter, please contact me at 904/488-3935.

Sincerely,

Jorge R. Caspary, P.G.
