Re: Preliminary Assessment Dredge Spoil Area, Fleming Key, USCG Parking Lot, Trumbo Point Annex and Sampling Analysis Plan for Munitions Response Program Limited Site Inspections at Fourteen Munitions Response Sites, Naval Air Station Key West, Florida

Dear Mr. Hayworth:

The Department has completed the technical review of the Preliminary Assessment Dredge Spoil Area, Fleming Key, USCG Parking Lot, Trumbo Point Annex document dated June 2010 (received June 28, 2010) and have no comments. The Department has also completed the technical review of the Sampling Analysis Plan for Munitions Response Program Limited Site Inspections at Fourteen Munitions Response Sites dated July 2010 (received July 28, 2010) and have the following comments:

1. **General Comment:** When sampling for metals this document states that they will be sampling for antimony, arsenic, copper, lead and zinc. The Department would like to add tin to this list of contaminant of concerns (COCs).
2. **Page 39, Pistol Range, Fleming Key:** This property is located adjacent to a site, "The Animal Import Center". Information on this site should be taken into consideration when assessing this munitions site.

If I can be of any further assistance with this matter, please contact me at (850) 245-8998.

Sincerely

Tracie Lynn Bolanos
Remedial Project Manager
