**RE: Corrective Measures Implementation Plan for Area of Concern C, Building 191,
Revision #4, Naval Station Mayport, USEPA ID #FL9 170 024 260, Mayport, Florida
(Tetra Tech NUS, October 9, 2009)**

Dear Mr. Syme:

I have reviewed the subject document dated October 9, 2009 which I received on October 12, 2009. The objective of this Corrective Measures Implementation Plan (CMIP) is to provide information on how the Corrective Measures selected in the Statement of Basis (SB) are implemented, maintained, and monitored for Area of Concern (AOC) C. I agree with the format of the document and concur with the corrective measures implementation plan for this site. However, I do have three comments for this CMIP. First, in the OBJECTIVE Section, hasn't Naval Station Mayport been issued a more current permit than the August 2005 one? If so, then this new permit should be referenced in the second paragraph. My second comment is to include additional constituents in the groundwater contaminants of concern list. Since tetrachloroethene (PCE) is being monitored, I believe all PCE break down products should be monitored as well. Please add to the list trichloroethene, cis-1,2-dichloroethene, and trans-1,2-dichloroethene. The third comment is to please update my contact information as discussed recently in Partnering Meetings. Please make these corrections for this CMIP, and for future CMIPs as needed, but consider this my final concurrence letter for this document.
