Jacksonville, Florida 32212-0030

RE: Draft Final Statements of Basis, Solid Waste Management Units 19, 26, 28, and 56, Naval Station Mayport, USEPA ID #FL9 170 024 260, Mayport, Florida (Tetra Tech, October 2, 2013)

Dear Mr. Hayworth:

I have reviewed the subject documents dated October 2, 2013. They were received on October 3, 2013. The documents were completed under Contract Task Order 0033.

The report states that *"Tetra Tech, Inc. is pleased to submit the Draft-Final Statements of Basis (SBs) for Solid Waste Management Units (SWMUs) 19, 26, 28, and 56 in electronic format for your review."*

Based on my review of each of these SBs, the Department has the following comments.

1. SWMU 19, Facility Background Section, Page 2, Column 2: Please revise/update the leachability discussion in the second paragraph to better explain to the reader that these contaminants are not leaching to groundwater even though they are above their FDEP default leachability cleanup criteria level.
2. SWMU 26: The Department concurs with the Statement of Basis for this SWMU.
3. SWMU 28, Facility Background Section, Page 2, Column 2: Please revise/update the benzo(a)pyrene subsurface soil discussion in the second paragraph. In one part of the paragraph benzo(a)pyrene is the contaminant above its SCTL and then benzo(a)pyrene equivalents are mentioned later in the paragraph.
4. SWMU 56, Facility Background Section, Page 2, Column 2: Please revise/update the background screen values discussion in the third paragraph. Additional information should be given in this paragraph concerning the NAVSTA Mayport Background Screening Values document and the acceptable background levels for iron and manganese.

Draft Final Statements of Basis
SWMUs 19, 26, 28, and 56, Naval Station Mayport
