150 Ninth Avenue, North  
Nashville, Tennessee 37203

Dear Mr. Tiesler:

As requested in your letter of March 30, 1982, completed State of Tennessee forms on "Potential Hazardous Waste Sites" for those facilities identified on the initial Superfund notification for Naval Air Station (NAS), Memphis, Millington, TN, are provided. Separate forms were used for each of the 16 sites identified. It should be noted that only limited information was available regarding the type of data required to fully complete the STATE forms at this time. However, a comprehensive study to identify potential hazardous waste disposal sites at NAS Memphis is planned for initiation during FY 83 which should provide more detailed information. Upon completion, this study will be forwarded for your information.

It is regretted that these forms could not be provided within the deadline suggested. However, due to the number of sites involved and necessary administrative reviews, this delay could not be avoided. If any additional information or clarification is needed, please contact Mr. Dick Bozung of this Command's Control of Hazardous and Industrial Pollutants staff at the above telephone number.

Very truly yours,

D. R. SPELL, P.E.  
Head, Environmental Branch
