RCRA Corrective Action Program
Notice of Inclusion on the 2020 Corrective Action Universe

Dear Mr. Danny Chumney:

Under a national initiative, the Tennessee Department of Environment and Conservation (TDEC) and the United States Environmental Protection Agency (EPA), Region 4 have compiled a list of facilities in Tennessee deemed appropriate and important to address using the Resource Conservation and Recovery Act's (RCRA) Corrective Action Program. Because the facilities on this list have national remediation goals which will culminate in the year 2020, it is referred to as the 2020 Corrective Action Universe. Your facility is part of this 2020 Universe.

As a result of this initiative, TDEC and EPA have the responsibility of ensuring whether Corrective Action dictated by the Resource Conservation and Recovery Act (RCRA) has been completed or, if necessary, a protective final remedy will be in place (i.e. remedy construction completed) at the above listed facility by the end of 2020. If we have not already done so, we will be contacting you to develop a plan and a schedule that achieves this goal.

The listed facility has been included in the 2020 Corrective Action Universe because one or more of the following is true:

- It is already part of the 2008 RCRA Corrective Action Baseline,
- It has a RCRA hazardous waste permit obligation, or

4/11/07

Page 2

- TDEC and EPA agreed that cleanup needs to be addressed under the RCRA Corrective Action Program.

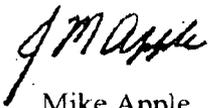

Inclusion on the list does not imply failure on the part of the facility to meet any legal obligation, nor should it be construed as an adverse action against the facility. It only means that TDEC and EPA have identified your facility as needing to complete its RCRA Corrective Action obligations if it has not done so already.

The national program goal is to address these cleanup obligations before the end of 2020. Accordingly, progress will be measured for each facility in the universe on a yearly basis. The list of facilities will be posted on EPA's web site at <http://www.epa.gov/correctiveaction>, on April 16, 2007.

TDEC and EPA will work to address remediation concerns at your facility in a manner consistent with your plans for the property. There are facilities on the 2020 Universe that have completed their RCRA Corrective Action obligations. If you believe that facility-wide corrective actions are already complete for your site, please notify us as to the current status of cleanup efforts.

If you have any questions regarding this letter, please contact Charles Burroughs of my staff at (615) 532-0863, or by e-mail at Charles.Burroughs@state.tn.us.

Sincerely,

Mike Apple
Director
