RE: Review of Draft Final Interim Measures Work Plan  
NAS Memphis, Tennessee  
EPA I.D. Number TN2 170 022 600

Dear Captain Straut:

The Environmental Protection Agency (EPA) is in receipt of the revised pages which the Navy submitted for insert into the "Draft Final Interim Measures Work Plan" (IMWP) for the partial investigation of SWMUs 4 & 5. The revisions adequately address EPA's concerns as set forth in our correspondence of October 19, 1992. The revised IMWP is therefore approved for the purposes of gathering data and information to be used in preparation of subsequent documents required under the RCRA/HSWA permit. The Tennessee Department of Environment and Conservation (TDEC) also concurs with this decision.

As acknowledged and agreed to by the Navy in previous correspondence, the IMWP will not meet the requirements of either a full RFI Work Plan or an Interim Measures (removal) Plan for these SWMUs. These documents must be submitted separately in accordance with the schedules in the approved Corrective Action Management Plan (CAMP). The full RFI Work Plan must be submitted in order to satisfy the facility's requirements under the RCRA/HSWA permit. The Interim Measures (removal) Plan must be submitted and approved before the facility can take action to remove or stabilize any contamination which underlies the proposed site of the new fire training facility.

EPA looks forward to receipt of the above documents. Should you have any questions or comments, please contact Ms. Allison Drew of my staff at 404/347-3016.

Sincerely yours,

  
Jon D. Johnston, Chief  
Federal Facilities Branch  
Waste Management Division
