RE: June 1998 Sampling Results, Building 200, Main Base,
Naval Training Center, Orlando, Florida
FDEP #488840202

Dear Mr. Ugolini:

I have completed the technical review of the above letter report dated August 10, 1998 (received August 12, 1998) submitted for Building 200. I cannot agree with a no further action proposal for this site until two consecutive quarterly samples show levels below the Groundwater Cleanup Target Levels (GCTLs). All monitoring wells currently meet the GCTLs, but monitoring wells MW-8 and MW-6 exceeded the GCTL for TRPH and dibenz(a,h)anthracene, respectively, in the previous sampling event. After the next round of sampling, a Site Assessment Report (SAR) addendum should be submitted recommending either no further action or natural attenuation with monitoring.

If I can be of any further assistance with this matter, please contact me at (904) 921-9989.

Sincerely,

John W. Mitchell
Remedial Project Manager
