 Greg Wilfley CH2M Hill
 Gerry Walker TtNUS
 Greg Fraley USEPA

Support Members:

Mike Silgeltary NAVFAC
 Allison Harris Ensafe

Guests

Tom Johnston TtNUS
 Ed Corl NACFAC
 Sherri Eng NAVFAC
 Jordan Adelson NAVFAC
 Peggy Churchill TtNUS
 John Winters FDEP
 CH2M Hill

1. **Team was led through the UFP-QAPP process for the OU 1 Optimization Study Implementation Project – Team decided a UFP SAP was not required (see below).**

New Consensus Items from February 12 & 13, 2008	
1	<p>Consensus Item 01 – At OU 1 NASP Team has determined that monitoring wells 01GS57, 01GS71, and 01GI72 have been damaged during Hurricane Ivan and are no longer usable. Therefore the wells must be replaced for those wells that have detected exceedances of SWCTLs within the last two sampling events. One new well cluster (shallow & intermediate depth) will be located downgradient of existing well 01GI46 to extend the point of compliance closer to Bayou Grande. This new well nest will be monitored based on the existing LTM along with the two replacement wells.</p>

New Action Items from April 10, 2008, Meeting

Action Item No.	Responsible Party	Status	Due Date	Action Item
A-010408	Gerry	Working	5/15/08	Do additional trend analysis of the OU 1 data including Mann- Kendall test for trends to develop an analytical strategy.
A-030408	Gerry	Working	5/15/08	Perform a statically analysis of the data to determine if the plume is stable - to be completed by TtNUS and scoped by Mike Singletary, Betty Lee and Brian Caldwell
A-030408	Gerry	Working	5/15/08	TtNUS is to verify that the MDLs for existing and new data are less than Quantitation limits
