**RE: Draft Focused Feasibility Study Report Addendum Site 2-Waterfront
Sediments, NAS Pensacola, Florida**

Dear Mr. Hill,

The Department has reviewed the subject document dated January 29, 2004 (received January 30, 2004) and find it to be adequate for its intent and approved. Please see the attached minor comments from Jeff Lockwood P.E.. If I can be of any further assistance with this matter, please contact me at (850) 245-8998.

Sincerely,

A handwritten signature in black ink that reads "Vaught".

DATE: March 17, 2004

SUBJECT: Draft Focused Feasibility Study Report Addendum
Site 2 – Waterfront Sediments
NAS Pensacola, FL

I have reviewed the subject submittal dated January 29, 2004 (received January 30, 2004). The document is adequate for its stated intent. Based on the information presented in the document, it appears that Alternative 1 ("No Action") could be implemented, with the only risk being to the resident marine organisms (Paragraph 2.1.3). Should there be a need to mitigate this risk, a sufficient number of other alternatives (capping, dredging, solidification/stabilization, or long-term sediment monitoring) have been considered in the report to address this concern.

For questions, please contact me at 7004 or (850) 245-7504.
