Subject: comments

Hi guys,

I just read through Shawn's comments on the Site 12 ROD and wanted to let to let you guys know the State's position on some of them.

2-1 Section 2.1
EPA guidance states that the EPA and the State are support agencies.

Table 2-18.
The capping requirements are Relevant and Appropriate. However, because we are actually digging up waste and disposing of it off site, this action becomes Applicable. Shawn is correct in that the air issue is Applicable.

Any questions, give me a call.

Curtis
