FINAL AFTER ACTION REPORT FOR REMOVAL ACTION AT SITE 28 NSWC INDIAN HEAD  
MD  
5/1/2009  
SHAW ENVIRONMENTAL

**FINAL  
AFTER-ACTION REPORT  
REMOVAL ACTION AT SITE 28  
NAVAL SUPPORT FACILITY INDIAN HEAD  
INDIAN HEAD, MARYLAND**

CONTRACT NO. N62470-02-D-3260  
TASK ORDER NO. 093

Prepared for:  
Naval Ordnance Safety and Security Activity  
3817 Strauss Ave., Suite 108  
Indian Head, MD 20640-5151

May 2009

## **1.0 Executive Summary**

Shaw Environmental, Inc. (Shaw) was contracted by the Department of the Navy, Naval Facilities Engineering Command (NAVFAC) Washington, to perform a removal action at Site 28, Naval Support Facility, Indian Head (NSF-IH), Maryland. The work was performed under Contract No. N62470-02-D-3260, Task Order 093 and in accordance with the approved Final Work Plan and Explosive Safety Submission (ESS).

The removal action activities at Site 28 were visually monitored by UXO Technicians. The activities included clearing and grubbing, installation of erosion and sediment controls, waste characterization sampling, and excavation and screening of soil/sediment. A total of 5,734 tons (3,200 cubic yards) of soil and debris were removed from Site 28. Additional screening operations were conducted at Site 11 Caffee Road Landfill due to the stockpiling of soil/sediment from Site 28.

A total of 14,185 single base propellant grains and 88,662 pieces of MPPEH 5X (rings, lids and cans) were recovered during the removal action at Site 28. The single base propellant grains were bagged, recorded and transferred to appropriate Naval Surface Warfare Center (NSWC) personnel for disposal and documented on a DD1348-1 form. The MPPEH 5X items were demilitarized by crushing, marked with orange high visibility marking paint and placed in a lockable container. These items were documented on a DD1348-1 form and sent for disposal at Montgomery Scrap located in Rockville, Maryland.

## **2.0 Verification Statement**

NAVFAC Washington is requesting formal verification from NOSSA that the final munitions response was completed in accordance with the approved explosive safety documentation.

## **3.0 Future Land Use**

The reasonably anticipated future land use for Site 28 will be industrial; however, no construction activities are currently planned for the site.

## **4.0 Munitions Response Sites**

The site that was the subject of the removal action was Site 28, which was also referred to as the “Original Naval Ordnance Station (NOS) Burning Ground”, the “Slavins Dock Area”, and the “Wildlife Area.” Site 28 is located in the northeastern portion of the NSF-IH bordering the northeastern shore of the Mattawoman Creek in Indian Head, Maryland. NSF-IH is an active installation within the Naval Support Activity South Potomac (NSASP) Command in the Naval District Washington (NDW) Region. Site 28 is comprised of two zones; Zone A and Zone B. The ESS addressed the activities which took place in Zone A. Currently there are no planned activities for Zone B. The overall size of the limits of disturbance for the activities performed at Site 28 was approximately 1.5 acres.

Site 11, which was also referred to as “Caffee Road Landfill”, was included as part of the project. Site 11 is located in the southern portion of the NSF-IH main installation bordering the southeastern shore of the Mattawoman Creek in Indian Head, Maryland.

The approximate limits of disturbance for the activities performed at Site 11 was 0.70 acres.

## **5.0 Removal Action Methods and Technology**

The following subsections discuss the removal action methods and technology used for Site 28 and Site 11. The screening technology was effective in segregating the MPPEH items and the propellant grains from the soil/sediment.

### **5.1 Site 28**

Visual monitoring of the activities being performed was the primary method of detection during the removal action at Site 28. Prior to beginning any intrusive activities, the UXO Technicians walked the site and verified that no visible propellant grains or other forms of suspect MEC and MPPEH were present within the limits of disturbance.

Clearing and grubbing was performed by field technicians in the support areas and the excavation areas to remove above ground vegetation, trees/saplings, and stump/root systems within the limits of disturbance. Clearing and grubbing activities were monitored by the UXO Technicians. In addition, the UXO Technicians visually monitored the silt fence installation and waste characterization sampling.

An excavator was utilized to remove the top six inches of contaminated soils/sediment within the area to be excavated. This soil/sediment removal was visually monitored by a UXO Technician. This soil/sediment was transported and stockpiled at Site 11.

Excavation of the soil from outside of the fence line, within 86 feet of House 108, occurred only when House 108 was unoccupied. Arrangements were made with the resident to ensure House 108 was vacant during excavation of this area. A manned barricade was placed in the driveway to ensure no access to the site during excavation.

The remaining contaminated soil at the site was then excavated to an average depth of two feet in the blue area shown in Figure 1 and to one foot in the gold area. The sediment shown in the brown area was also excavated to an average depth of one foot. Excavation depths were restricted by the water table. These depths were based on concentrations of metals in the soil/sediment that posed a potential risk to human health and the environment.

Because propellant grains and MPPEH (i.e. propellant can lids, rings, etc) were observed in the Site 28 excavation area, all soil was screened with a multi-stage mechanical screener. The screener had 5-inch, 1 ½ - inch, and ¼ - inch screens. This screen assembly was effective with the removal of MPPEH items (lids, rings, cans, etc), stone, concrete, bricks, etc through the large screen and the removal of all propellant grains from the soil through the smaller screens. A qualified UXO Technician monitored the screening activities and responded appropriately using procedures established in the approved ESS. Any propellant grains or MPPEH recovered during screening operations were addressed in accordance with the ESS. All other non-munitions related material and debris was treated as construction debris and was disposed of with the soil/sediment.

Once the soil/sediment was screened, the UXO Quality Control Specialist (UXOQCS) performed a quality control check of the screened material in accordance with the ESS. In order to prevent excessive accumulation of soil near the screening equipment, screened soils were QC inspected on a daily basis and relocated to a staging area for final loadout. Screened soil/sediment was certified as MEC- and MPPEH-free and transported to Soil Safe Inc. located in Brandywine, Maryland.

## 5.2 Site 11

Visual monitoring of the activities being performed was the primary method of detection during the screening operations at Site 11. The top six inches of soil/sediment excavated from Site 28 and stockpiled at Site 11 (Caffee Road Landfill) was screened on site for propellant grains and MPPEH using the same equipment and processes as with Site 28. The screened soil/sediment was certified as MEC-and MPPEH-free and transported to Soil Safe Inc. located in Brandywine, Maryland. Any propellant grains or MPPEH identified during screening operations were addressed in accordance with the approved ESS.

## **6.0 Variations from the Approved Explosive Safety Submission**

The removal action at Site 28 began on October 15, 2007 under an ESS Waiver. Work was stopped on November 7, 2007 when three single base propellant grains were discovered at Site 28. An ESS was submitted in January 2008 and approval was received from the Department of Defense Explosives Safety Board on March 4, 2008. Correction 1 was made to the ESS on March 3, 2008 which changed the ESS to include MPPEH items. Correction 2 was made to the ESS on June 3, 2008 which changed information regarding the landfill. Amendment 1 was made to the ESS on July 22, 2008 which addressed the increase of the NEW and ESQD arcs for MPPEH items. Correction 3 was made to the ESS on October 21, 2008 which addressed screening operations at Site 11. A pre-final inspection of the Site 28 removal action was held on November 19, 2008.

## **7.0 Areas Where Munitions Response was not Performed**

Response activities were performed for the area within the limits of excavation except for near/beneath existing monuments (i.e. observation well 14 with a concrete slab, and fence posts) where equipment access was not possible.

## **8.0 MEC and MPPEH Found and/or Recovered**

A total of 14,185 single base propellant grains weighing 222,244 grams (490 pounds) were recovered during the Site 28 removal action. The single base propellant grains were disposed of at the Strauss Avenue Thermal Treatment Plant (SATTP) located at NSF-IH, Maryland. In addition, 88,662 pieces of MPPEH 5X comprised of rings, lids and cans were recovered during the removal action at Site 28. The MPPEH 5X items collectively weighed 68,407 pounds (34 tons) and were disposed of at Montgomery Scrap located in Rockville, Maryland.

## **9.0 Project QC and QA Reports**

All UXO Technicians met or exceeded the requirements of the Department of Defense Explosives Safety Board Technical Paper (DDESB TP) 18. The UXO team consisted of a UXO Technician III, who served as a UXO Safety Officer and a UXOQCS, and a UXO Technician I. Both technicians were familiar with the appearance of single-base propellant grains and had experience and/or certification in identification, classification, and remediation of such propellants. Explosive Ordnance Recognition (EOR) training was given to all site employees by the UXO Technicians. The sign in sheet for the EOR training is provided in Attachment 1.

A field activity daily log (FADL) was completed each day by the UXOQCS summarizing the day's activities. The FADLs are provided in Attachment 1.

The UXOQCS was responsible for inspecting and certifying the screened soils as MEC- and MPPEH-free prior to shipment off base. This was performed in order to ensure only soils free of propellant grains and MPPEH were released from DoD control. The UXOQCS checked 25% of all soils prior to stockpiling for loadout. After the soil was mechanically screened, the UXOQCS removed 25% (by volume) of the screened soil and manually screened it through a 1/8" wire mesh screen box approximately 5' by 5'. The UXOQCS sifted the amount of soil through the screen and inspected it for any remaining propellant grains or MPPEH. If none were identified, the entire pile of soil was considered clean, and it was placed in the stockpile area for off base disposal at Soil Safe Inc. located in Brandywine, Maryland. If a MPPEH or propellant grain was identified in this 25% check, the entire pile was rejected, re-screened, and another QC inspection was performed.

If no MPPEH or propellant grains were found after four 25% checks, the checks were reduced to 10%. If during a 10% check any MPPEH or propellant grains were found, those soils were rejected and the QC checks were increased to 25% until four checks were found to be MPPEH and propellant grain free. The UXOQCS confirmed the proper treatment/disposal of all items. DD-1348 forms were completed for the disposal of the single base propellant grains and the MPPEH items and are provided in Attachment 1.

Quality assurance activities for Site 28 were performed by a qualified Dahlgren UXO technician who served as a third party check of the contractors QC activities. QA personnel ensured that all activities being performed were in compliance with the approved ESS and the contract's scope of work.

## **10.0 Land Use Controls**

There should be no need for controlling land use with respect to explosives safety within the areas of excavation, as shown on Figure 1, since excavation was to a depth of one to five feet and the grains are not expected to be located at depths greater than six inches. However, since it is unknown whether the grains found were a result of burning activities at the site or if the grains came from the upgradient MRP Site (UXO 09), the boundary of site, will remain in the Geographical Information System (GIS) as an area that potentially contains single base propellant grains. Excavation will not be allowed in this area

without a NOSSA-approved ESS. Additionally, Site 28 will remain in control of the federal government (Navy). The reasonably anticipated future land use for Site 28 will likely be industrial; however, no construction activities are currently planned for the site.

### **11.0 Long-Term Management**

Potential explosives safety risks will remain at the site outside of the excavated area as described in Section 10 above. Therefore, this area will be addressed with the upgradient MRP Site UXO 09, Single Base Propellant Grains Spill Area. Since the soil removal action at this site was not conducted to specifically address potential explosives safety risks, no monitoring or 5-year reviews will be conducted with respect to the single base propellant grains. However, the site will be monitored for erosion until the vegetation takes hold.

### **12.0 Request to Cancel any EZs or other Site Approvals**

The exclusion zones (EZs) and ESQDs established in support of the munitions response were only applicable during Site 28 removal activities and the Site 11 screening operations. The operations at both Site 28 and Site 11 have been completed.

### **13.0 Maps**

#### a. Future Land Use

The reasonably anticipated future land use for Site 28 will likely be industrial; however no construction activities are currently planned for the site. A figure is not applicable.

#### b. Munitions Response Areas

The munitions response areas included the removal action at Site 28 and the screening operations at Site 11. The munitions response activities occurred within the limits of excavation at Site 28. Figure 1 shows the limits and average depths of excavation activities performed at Site 28. The munitions response activities at Site 11 were for screening of stockpiled soil. There were no changes made to the existing ground surface at Site 11, therefore a figure is not applicable.

#### c. Non-Munitions Response Areas

The only area requiring munitions response at Site 28 was the area within the limits of excavation. Equipment access was not possible near/beneath a few existing monuments (i.e. observation well 14 with the concrete slab and fence posts). Observation Well 14 and the fence line are shown on Figure 1.

#### d. MC Sampling Locations

Not applicable.

#### e. Residual munitions hazard and chemical risk

Not applicable.

**14.0 Digitally Recorded and Geo-Referenced Maps of Subsurface Geophysical Anomalies**

Digitally recorded and geo-referenced maps of subsurface geophysical anomalies were not required.

**15.0 Dig Sheets**

Geophysical mapping and investigation was not conducted at Site 28 therefore dig sheets for the excavations were not needed.

**16.0 Color Photographs of Major Activities and Recovered MEC or MPPEH**

Color photographs of the screening operations and recovered MEC or MPPEH are provided as Attachment 2.

**17.0 Videotape with Voice Narration**

A videotape with voice narration showing the major response activities and recovered MEC or MPPEH was not developed for the removal action at Site 28.

**18.0 Description and Results of Laboratory Analyses of MC Sampling**

MC sampling was not conducted at Site 28.

**19.0 Archaeological Sites or Environmentally Sensitive Areas**

Archaeological sites or environmentally sensitive areas were not encountered during the removal action at Site 28.

FIELD ACTIVITY SUBJECT: UXO Support, and Screening.

**DESCRIPTION OF DAILY ACTIVITIES AND EVENTS,**

0700 Arrived Shaw office, attended morning safety meeting.

0800 10% of load checked for propellant, none found.

0845 10% of load checked for propellant, none found.

0900 Started QC of MPPEH.

1000 Found 25 ea., 400 grams of single based propellant. # 28-036.

1015 10% of load checked for propellant, none found.

1330 10% of load checked for propellant, none found.

1500 10% of load checked for propellant, none found.

1600 25 ea. Single grain propellants weighing 400 grams, picked up by NSWC personnel, Nancy Burroughs.

1645 QC'd 1284 ea., 873 pounds of MPPEH, all were found to be 5X.

1710 Secured screening operations.

1730 Secured for the day.

Note: Mario Villarreal on board as independent UXOQC.

DESCRIPTION OF DAILY ACTIVITIES AND EVENTS,

0700 Arrived Shaw office, attended morning safety meeting.

0800 10% of load checked for propellant, none found.

0830 Found 26 ea., 425 grams of single based propellant. # 28-061

0845 10% of load checked for propellant, none found.

1000 10% of load checked for propellant, none found.

1100 27 ea., 425 grams of single based propellant picked up by NWSC personnel, Nancy Burroughs.

1115 10% of load checked for propellant, none found.

1130 Found 27 ea., 425 grams of single based propellant. #28-062

1300 Began QC of MPPEH. Began load-out of MPPEH scrap.

1400 27 ea., 425 grams of single based propellant picked up by NWSC personnel, Nancy Burroughs.

1415 Found 37 ea., 425 grams of single based propellant. #28-063

1500 Finished load-out of approx. 11 tons of MPPEH scrap.

1515 10% of load checked for propellant, none found.

1600 37 ea., 425 grams of single based propellant picked up by NWSC personnel, Nancy Burroughs.

1615 10% of load checked for propellant, none found.

1700 10% of load checked for propellant, none found.

1800 10% of load checked for propellant, none found.

1900 Secured screening operation.

1930 Secured for the day.

**DESCRIPTION OF DAILY ACTIVITIES AND EVENTS,**

0700 Arrived Shaw office, attended morning safety meeting.

0815 Uncovered an area containing a large amount of single base propellant (in excess of 100 pounds). Removed all non-UXO personnel from site. Notified A. Forshey and B. McLaughlin. Began packing propellant into one pound bags (#28-102 thru 28-132). AF and BM began notification of Navy and corporate personnel. J. Bleshoy and E. Peters continued packaging and attempting to determine the extent of the propellant.

1300 31 packages of propellant ( 888 ea., 1240 grams) picked up by NWSC personnel, Paul Dunnington.

1330 AF reported that D. Murray, NOSA, waived the one pound per bag restriction as long as the propellant was being prepared for shipment and not being stored. JB, EP began filling bags for the afternoon pick-up.

1515 6 Bags prepared for pick-up, #28-133 thru 28-138 ( est. 2079 ea., 74.25 pounds).

1530 6 bags of propellant (#28-133 thru 28-138 picked up by NWSC personnel, Paul Dunnington.

1600 Site secured .

1630 Departed for the day

Note: Prior to site evacuation, QC'd 143 ea., 59 pounds of MPPEH, all were found to be 5X.

**DESCRIPTION OF DAILY ACTIVITIES AND EVENTS.**

0700 Arrived Shaw office, attended morning safety meeting.

0745 J. Bleshey, E. Peters at work site. Will determine the size of propellant burial area found yesterday and begin packaging propellant.

0830 JB, EP determined that the propellant burial area is approx. 8' x 10' x 2' deep, with an estimated 100 lbs. of propellant remaining in the ground.

0830 Linda Wirth, NWSC, on site to deliver packaging supplies and show the proper packaging method for the propellant. She will arrange pick-ups for 1130 and 1600.

1200 Paul Dunnington, NWSC, picked up 11 bags of propellant (#28-139 thru 28-149) containing an estimated total of 1708 pieces and 61 pounds net weight.

1300 JB, EK continuing to unearth and package propellant.

1530 Burial site clear of propellant. Continuing packaging operation.

1600 L. Wirth on picked up 11 bags of propellant (#28-150 thru 28-160) containing an estimated total of 1484 pieces and 63 pounds net weight.

1700 Secured site

1730 Departed for the day.

# FIELD ACTIVITY DAILY LOG

F1

Daily Log	Date:	7	30	2008
	No.			72
	Sheet	1 of		1

PROJECT NAME: Site 28; Indian Head, MD Project Number: 126566

FIELD ACTIVITY SUBJECT: UXO Support, and Screening.

**DESCRIPTION OF DAILY ACTIVITIES AND EVENTS,**

0700 Arrived Shaw office, attended morning safety meeting.

0745 Began screening operations. 10% of load checked for propellant, none found.

0800 Began QC of MPPEH.

0900 10% of load checked for propellant, none found.

1000 Found approx. 1 pound of propellant. Continued screening. JB began packaging for 1100 pick-up. #28-230

1030 10% of load checked for propellant, none found.

1100 #28-230 picked up by NWSC personnel, Nancy Burroughs.

1300 10% of load checked for propellant, none found.

1430 Finished first screening of soil pile. Began re-screening reject material.

1445 10% of load checked for propellant, none found.

1500 Found approx. 1 pound of propellant. Continued screening. JB began packaging for 1600 pick-up. #28-231

1600 #28-231 picked up by NWSC personnel, Nancy Burroughs.

1615 QC'd 1656 ea., 1294 pounds of MPPEH, all were found to be 5X.

1630 Secured screening ops. All personnel went to Caffee Rd. site to cover stockpile.

1730 Departed for the day.

### CERTIFICATE OF RECYCLING

Shaw Environmental  
P.O. BOX 187  
Indian Head, MD 20640  
Fax: 225-987-3158  
Attention: Joey Guzzardo

July 8, 2008

RE: Certificate of Recycling

To whom it may concern:

This is to verify that on June 30, 2008, 21,180 lbs of recyclable ferrous material was shipped via truck from Indian Head Naval Center, Doc. ID # 041195-063008 in Indian Head, Maryland to Montgomery Scrap Corporation of 15000 Southlawn Lane, Rockville MD. The above stated material passed all necessary inspections to be processed as Montgomery Scrap Corporation sees best fit. Montgomery Scrap Corporation now agrees to take possession and responsibility of this material, and will see that it is recycled in a proper manner.

If you have any further questions pertaining to this matter, please feel free to call.

Thank You,

Monica L. McVay, Settlement Administrator  
Montgomery Scrap Corporation  
301-424-3000, ext. 28
