E-MAIL CONCERNING RELOCATING TELEPHONE LINES AT THE OLSEN ROAD LANDFILL
NSWC INDIAN HEAD MD
6/8/2005
NAVFAC WASHINGTON

Morris, Jeffrey CIV (NAVFACWASH)

Subject: RE: Items for Indian Head for Olsen Road Project

Cathy,

If you recall, I didn't know that Jamie would be moving the telephone lines. It was my understanding, through discussions with Patrick Gannon, that the contractor (Shaw) could do this.

Anyway, the telephone line relocation is shown on drawing C-13 in Appendix C of the draft work plan prepared by Field Support Services, Inc., dated April 2005 (You should have a copy of this. It is the same drawing as in the Final Remedial Action Design Submittal, Volume II prepared by Tetra Tech NUS, dated March 2005). The existing line, which heads west out from Building 1866 to a telephone pole in the landfill will be cut and the new line will come out of the building, go northeast over the loading dock in a conduit 14 feet above the ground, as shown in the drawing. Note E5 states "Install conduit at an elevation of Approx. 14'-0" above finished floor of loading dock."

At the edge of the dock, the line will go down into the ground and head south (under the grounding girdle, as I understand it) to a telephone pole located near Pullbox 1866-TA-3, which is also shown in drawing C-13.

Please note that the line is shown on the drawing.

If you need additional information, or want to get together on this, please let me know. I will be out of the office tomorrow and have a meeting this morning from 0930 - 1030.

Thanks,
Shawn

Shawn,

Jamie says he was not included in this project. We need to show him where we are relocating phone lines. It's not clear on the drawings.

Cathy

Jamie,

Do you know anything about the the Olsen Road Landfill project? This is one of the Remediation Jobs. You are to relocate telephone lines near bldg 1866.

So I guess it's me.....but I usually don't start construction work until the project is awarded.
But I will give Jamie a Heads up.

Cathy

Guys,

Bob is working his part.

Shawn, have you talked to Jamie Williams (telephone guy) about this work and who is working on the underground part for the fire alarm???

We have been working on that for about a month now, I am waiting for some more material to continue work but I will be ready to remove the poles whenever they need me to. Don't forget that someone needs to be working on relocating the underground part of the fire alarm and also relocating the telephone.

Steve,

I can get the key from Security.

Bob,

Do you know when you will work on relocation of the power lines at Olsen Road?

Cathy,

I was wondering about the status for the overhead utility line relocation for Olsen Road, has that been done or are scheduled in the near

future?

Also on the Scrap Yard, do you know who would have a key for the gate. I am trying to set up a site visit for the Scrap Yard and I need to know if we can get inside the gate.
